

How to get TCL TVs to work with the Processor

You'll need to use HDMI port 3 for each of your TVs and set the HDMI Mode to "2.0" instead of "AUTO" or "1.4". By default, your TVs are set to AUTO.

Home-> Settings -> Screensaver -> Wait Time -> Disable Screensaver

Picture Settings -> HDRnotification ->Off

TV INPUTs -> HDMI3 -> HDMIMODE -> HDMI2.0

AUDIO-> TVSPEAKERS -> DISABLE

S/PDIF and ARC-> PCM_STEREO

SYSTEM-> POWER-> POWERON-> HDMI3

SYSTEM-> POWER-> AUTOPOWERSETTINGS-> DISABLE
